ZIRCONIA
"ON THE CUTTING" EDGE"

Combining current prosthodontic practices and principles to achieve reliable performance outcomes of our implant restorations requires a rethinking of our choice of prosthetic materials as well as an understanding of current surgical protocols. High strength ceramics (zirconia) and advanced prosthetic workflows are now able to provide the possibility of achieving performance outcomes exceeding all previously reported success parameters.

This presentation will address the framework of knowledge required to understand the global impact of zirconia as well as dental implants on improving our patient treatment outcome with respect to esthetics, function and efficiency of time.

Learning objectives:

1. Understand of the benefits of high performance zirconia ceramics.
2. Achieve insight into new treatment workflows and patient treatment outcomes.
3. View clinical performance data of high performance ceramics.

Course Details

Date	Thursday, October 18, 2018
Time	5:30-6:00pm Registration & Dinner
	6:00-6:10pm Program introduction by Dr. Gregory Guichet

MODERATOR

Dr. Gregory Guichet served on the Board of Directors of the American College of Prosthodontics and also maintains membership in many professional organizations. He graduated from Georgetown University School of Dentistry and received his specialty training at the University of Southern California where he served as a clinical instructor. Dr. Guichet's publications include Classification of Prosthodontic Patients in addition to integration of laboratory technologies in esthetic reconstructions. He coauthored the Parameters of Care for the specialty of Prosthodontics in 2006.

SPEAKERS

Dr. David Guichet is a Diplomate of the American Board of Prosthodontics and a graduate of the Maxillofacial Prosthetics Residency at UCLA. He completed a Prosthodontic Residency at the VAMC Wadsworth in West LA, a GPR at the VAMC in Long Beach CA, and received a DDS from UCLA. Dr. Guichet is president of the Pacific Coast Society for Prosthodontics and past president of the Osseointegration Foundation and the Orange County Dental Society. Dr. Guichet served as program chair for the Academy of Osseointegration, the American College of Prosthodontists, and the Pacific Coast Society for Prosthodontics. He was the Director of Continu-ing Professional Education for the American College of Prosthodontics and has chaired the ACP Digital Dentistry Symposium for the last four years. Together with his brother he main-tains a prosthodontic practice in Orange and Newport Beach California where he has in-stalled a comprehensive digital, clinical and laboratory CADCAM process.

Dr. Michael Moscovitch received his DDS. from McGill University (1976). He completed his Prosthodontic training at Boston University, Henry M. Goldman School of Dental Medicine (1978). Presently he is an Assistant Clinical Professor, Division of Restorative Sciences, at Boston University, and Clinical Instructor, McGill University Residency Program at the Jewish General Hospital in Montreal. He is a member and Past-President of the Association of Prosthodontists of Canada. As well he holds memberships in numerous dental organizations. He has lectured and published internationally and actively contributes to dental education. He maintains a private practice in Montreal limited to Prosthetics and
